

MHP is now working with the Mendix platform to release the full potential of low code for its clients.

PRESS RELEASE

MHP adds Mendix to its network

14. Juni 2023

Expanding the partner community

- MHP is the new Mendix solution partner
- The management and IT consultancy works with the Mendix platform to release the full potential of low code for its clients
- Mendix's partner business continues to grow in the DACH region

Ludwigsburg – MHP continues to expand its partner community. The latest member is Mendix, a Siemens subsidiary and global market leader in the development of modern enterprise applications. The aim of this partnership is to embed low-code technology more deeply in the automotive and manufacturing industries and to demonstrate with best practices how these industries can harness the individual benefits of low-code development for themselves. By using the low-code pioneer's platform, the management and IT consultancy MHP will increasingly drive forward the digitalisation projects of its customers in the mobility and manufacturing industries in the future.

Mendix values MHP's one-stop-shop approach, which includes strategic value creation, architecture consulting and full-stack software delivery. This portfolio ideally complements Mendix's low-code platform and creates synergies to offer customers a more comprehensive range of solutions for accelerating their digital transformation.

Fit for the future with low-code

MHP has already had some experience with the Mendix low-code platform, realising a range of projects in recent months - including for OEMs with more than 10,000 active users, or projects with a time-to-value of six weeks.

National and international customers are expected to profit from low-code, particularly in process digitisation and IT transformation - with value-creating use cases benefitting IT and specialist departments to an equal extent. MHP sees Mendix as a strategic low-code platform

to provide companies with the capabilities to meet current and future requirements. They will be able to drive their transformation with technology that promises, among other things, time and monetary efficiency by creating platform synergies. This is because low-code enables capacities and skills to be deployed in a more targeted manner, and because shorter project durations and a faster time-to-value are a great benefit for mixed teams made up of IT professionals and staff from specialist departments. These are also central challenges for MHP customers, whose digitisation projects are being hampered in particular by capacity and personnel shortages in both their IT departments and their specialist departments. As a result, companies hardly have the time to deal with the potential offered by digitalisation or to take advantage of it. Consequently, this is an environment in which low-code technology can really play to its strengths.

Wide-ranging business opportunities for Mendix and MHP

Mendix CEO Tim Srock explains: "We are delighted about the latest member of our partner network in the DACH region. With MHP, we have brought in an accomplished technology expert for our low-code platform with proven sector expertise. We have the same sustainable approach to building business relationships. This enables Mendix and its partners to provide the stable support our clients want."

Björn Kasten, partner and head of Digital Platforms & Solutions at MHP, adds: "From our point of view, Mendix is one of the leading low-code platforms on the market. It provides an ideal symbiosis of low-code simplicity with the simultaneous potential for highly individualised requirements. So, for us, Mendix is one of the strategic platforms that our customers will rely on going forward."

With its low-code technology, Mendix and its partners are tapping into a growing market potential: analysts at Gartner, for example, predict that by 2025, 70 per cent of all new applications will be developed with low-code or no-code.

About Mendix

The "digital first" approach is now shaping almost all sectors and industries. Comprehensive, accelerated digital transformation is therefore the key to survival and success for companies and organisations. With its industry-leading low-code platform, Siemens subsidiary Mendix enables companies to develop applications faster than ever before, promotes agile collaboration between IT and business experts and keeps IT in control of the entire application landscape. As the low-code engine of Siemens' Xcelerator platform, and through its dedicated partner network and extensive marketplace, Mendix supports advanced technology solutions that streamline operations, eliminate IT congestion, enable automation and dramatically increase developer productivity. Consistently cited as a leader and visionary by leading industry analysts, the Mendix platform is cloud-native, open, extensible, agile and well-proven. From artificial intelligence and augmented reality to intelligent automation and native mobile apps, Mendix and Siemens Xcelerator form the backbone for those companies embracing digitalisation. The Mendix low-code platform is used by more than 4,000 companies worldwide, over 250,000 applications have already been realised, and the active community comprises more than 300,000 developers.

An aerial photograph of a winding asphalt road that curves through a dense, lush green forest. The trees are vibrant green, and the road is dark grey with white lane markings. A few small cars are visible on the road, providing a sense of scale. The overall scene is peaceful and natural.

ENABLING YOU TO SHAPE A BETTER TOMORROW.

About MHP

As a technology and business partner, MHP digitizes its customers' processes and products and supports them in their IT transformations along the entire value chain. As a digitization pioneer in the mobility and manufacturing sectors, MHP transfers its expertise to a wide range of industries and is a premium partner for thought leaders on their way to a better tomorrow. MHP serves over 300 customers worldwide. Among them are leading corporations, innovative medium-sized companies and disruptive start-ups. MHP provides both operational and strategic consulting and delivers proven IT and technology expertise as well as specific industry know-how. The consultancy operates internationally, with headquarters in Germany and subsidiaries in the USA, the UK, Romania and China. For over 27 years, MHP has been shaping the future together with its clients. More than 4,000 MHP employees are united by the demand for excellence and sustainable success. This aspiration continues to drive MHP - today and in the future.
